

## **IO** NEED-TO- KNOW CHANGES TO THE ICD-10 CC and MCC Lists

Here are some of the latest updates as to what is defined as either a complication or comorbidity (CC) or a major complication or comorbidity (MCC).

CHANGE #1	ARDS is now MCC
CHANGE	Sepsis folllowing an OB procedure can
#2	be coded and is an MCC

CHANGE #3	Congenital Zika is an MCC
CHANGE #4	Appendicitis has new codes specifying patients who have peritonitis but may or may not rupture or have an abscess
CHANGE #5	HIV is no longer an MCC - It's a CC
CHANGE #6	Encephalopathy unspecified or other are no longer MCCs They are downgraded to CCs G93.40 and G93.49
CHANGE #7	<b>Cholangitis is no longer a guaranteed CC</b> K83.09* "other" still works, but not the entire K83.0* code range
CHANGE #8	A number of DRG changes based on insertion codes for pacemakers

CHANGE #9	A number of new codes were added for adult and child labor/sexual exploitation and they have been designated as CCs
CHANGE #10	Sepsis following a procedure initial encounter as a secondary diagnosis provides a CC

## Clinical Documentation Improvement Boot Camp

Trusted by thousands of CDI professionals, you'll leave the boot camp with a complete understanding of:

- The ICD-10-CM Official Guidelines for Coding and Reporting, as seen from a CDI perspective
- Diagnoses frequently in need of additional documentation to support accurate code assignment across all major body systems
- The value of querying the provider for clarification and best practices associated with the query process
- Tips for educating physicians on the basics of hospital reimbursement under IPPS and the value of complete documentation on organizational and professional profiling
- IPPS methodology based on MS-DRG assignment and the impact of diagnosis assignment and sequencing on hospital reimbursement
- CDI benchmarking basics, compliance risks, and professional ethics
- And more!
